Thanks Eric,

EOC PIO it's critical that the people Eric lists below be alerted when you send approved data to the web team. These are the people who will make sure it appears on the interactive map.

Daniel (Danny) Hart | Acting Director of Web Communications | Office of Public Affairs | U.S. EPA
| [Tel:202.564.7577](tel:202.564.7577) | cell: 202.365.7095

All -

This is a 30 minute notification that we are preparing to post the attached data to our website with the descriptive language below. Please go ahead to make any Congressional

or other notifications. as appropriate.

Thanks

Laura

one-liner for main page:

The EPA sediment samples collected on August 11th at locations along the Animas and San Juan Rivers have been validated.

Longer descriptive:

The EPA sediment samples collected on August 11th at locations along the Animas and San Juan Rivers have been validated.

EPA has done a review of the data which included a comparison to screening levels for exposure during recreational use to determine if the metal concentrations are consistent with pre-incident levels.

The metal concentrations of the samples were below soil/sediment recreational screening levels. Based upon the sediment sampling results, sediment sample concentrations are trending toward pre-event conditions

Subject: Region 6 sediment samples for August 11

This data set has been reviewed by HQ EU and is approved to post once approved by PIOs.

This is supplemental sediment results for August 11 and should be associated with the Aug 10 12 and 13 data approved previously. There are 9 samples in this data set.
